

# Automated Network Management

## Customer Journey Map

### SCENARIO

Employees raise network requests through the ServiceNow portal. Requests go through approval, are processed by the network team, and users receive updates until the request is closed.

### ENTICE

How does someone initially become aware of this process?

#### Need Network Service

User realizes they need a network service or access.

#### Discovers Self-Service Portal

User learns about the Service Portal from IT team, email, or intranet.

#### Visits ServiceNow Portal

User navigates to the ServiceNow Self-Service Portal.

#### Navigates to Network Services

User goes to the Network Services catalog section.

#### Explore Available Services

User browses available network request options.

### ENTER

What do people experience as they begin the process?

#### Select Request Type

User selects the appropriate network request type.

#### Fill Request Details

User provides necessary details (e.g., location, access type, justification).

#### Submit Request

User reviews and submits the network request.

#### Request Created

Request is created successfully and a request number is generated.

#### Acknowledgement Sent

User receives email/SMS acknowledgement with request details.

### ENGAGE

In the core moments in the process, what happens?

**Approval Workflow**  
Request is routed to the appropriate approver(s).

**Approve / Reject**  
Approver reviews the request and takes action.

**Approval Status Updated**  
Request status is updated based on approval decision.

**Task Assigned to Network Team**  
Once approved, the request is assigned to the network team.

**Request Processing**  
Network team processes the request as per requirements.

**Status Updates**  
Status is updated at key stages of processing.

**Notifications Sent**  
User receives notifications for status changes.

**Request Completed**  
Network team completes the requested task.

**Validation / Testing**  
Request is validated and tested if required.

**Ready for Closure**  
Request is marked as ready for closure.

### EXIT

What do people typically experience as the process finishes?

**Request Closure**  
Request is closed in the system.

**Closure Notification**  
User receives notification that the request is completed.

**Rate the Experience**  
User is prompted to rate their experience.

**Provide Feedback**  
User provides feedback or comments.

**View in History**  
Request appears in user's request history.

### EXTEND

What happens after the experience is over?

**Personalized Recommendations**  
System suggests other relevant network services.

**Proactive Notifications**  
User receives proactive alerts or maintenance notifications.

**Repeat Requests Easier**  
Past requests help speed up future submissions.

**Reports & Insights**  
IT/Admin monitors requests via dashboards and reports.

**Continuous Improvement**  
Feedback and data help improve network services.
